Profile

Full-stack software engineer with years of experience in web and mobile development. I build software that is fast, accessible and easy to maintain, and I learn new technologies quickly. AI coding agents make me much faster in my daily work: I plan the work, build it with their help and review every change.

Experience

Full-Stack Software Engineer, IGT Systems (Bratislava, hybrid) Feb 2025 – present

- Responsible for the project management module of **Core3**, a business platform for projects, HR and CRM: kanban boards, task permissions, Scrum and Waterfall workflows.
- Optimized the slowest Core3 pages by fixing N+1 database queries, adding caching and loading data in the background.
- Developed the **WYDO** sports app for Android and iOS in Kotlin Multiplatform, then moved its web version to React.
- Built the **CleanEEG** web app from scratch, including a WebGL viewer that compares raw and cleaned brain signals (EEG), and the frontend of **BDAP**, an analytics dashboard for an enterprise client.

React, TypeScript, TanStack, Kotlin, Spring Boot, Elixir, Phoenix LiveView, PostgreSQL, MongoDB

Full-Stack Developer, Švarba s.r.o. (remote) Jun 2024 – Jan 2025

- Developed the REST API of a new internal company system, a React web app that replaced several older PHP applications.
- Implemented real-time notifications, scheduled data imports and exports, and AI translations of product texts.

TypeScript, Node.js, Express, React, MSSQL, Redis, Jest, PHP, Nette

Junior Python Developer, SoftPoint s.r.o. (Bratislava, hybrid) Oct 2023 – May 2024

- Built ETL data pipelines in Airflow importing products, prices and stock from 20+ suppliers.
- Automated ordering on 20 supplier web shops with headless-browser scripts in Ruby, a language I learned for this task.

Python, Airflow, pandas, Selenium, Ruby, PostgreSQL, FastAPI

Skills

Frontend	TypeScript, JavaScript, React, Next.js, TanStack, Angular, Vue, Nuxt, HTML, CSS, Tailwind CSS, Bootstrap
Backend	Kotlin, Java, Spring Boot, Node.js, Express, Elixir, Phoenix, Python, FastAPI, PHP, Laravel, C#
Mobile	Kotlin Multiplatform, Compose Multiplatform
Data	PostgreSQL, MongoDB, MSSQL, Redis, Airflow
AI	Agentic development with Claude Code and Codex (agents, skills, MCP servers), OpenAI API, PyTorch
DevOps and testing	Docker, Kubernetes, GitLab CI, GitHub Actions, Linux, nginx, Vitest, Jest, Playwright, Cypress
Practices	REST APIs, a11y, i18n, l10n, SEO, performance optimization, UI/UX, automated testing, Scrum
Languages	Slovak (native), Hungarian (fluent, C2), English (advanced, C1), German (basic, A2)

Education

Slovak University of Technology in Bratislava, Faculty of Informatics and Information Technologies

Ing. in Intelligent Software Systems 2022 – 2024
Thesis: Neural network based semi-automatic segmentation methods to enhance the detection and monitoring of human eye diseases

Bc. in Computer Science 2019 – 2022
Thesis: Problem generator for analytical geometry in the plane: conic sections

Selected projects

- **SmartTech e-shop** (2021 – 2026): online shop with fuzzy search, checkout and admin area — Laravel
- **Modern Fashion Store** (2025 – 2026): inventory dashboard with live updates — Elixir, Phoenix
- **Glaucoma segmentation** (2023 – 2024): master's thesis, neural networks for eye images — PyTorch
- **Portfolio website** (2026): rebuilt with five older projects using AI coding agents — Next.js

Other projects include Pokédex, FakeShop, Feast Finder, Budget Master, Advent of Code and Iridescent.
You can find all of them and read more about me at akoskappel.dev.
