Profile

Full-stack software engineer with three years of experience in web and mobile development, from the database to the user interface. I build software that is fast, accessible and easy to maintain, and I learn new technologies quickly. I work with AI coding agents every day: I plan the work, the agents build and test it, and I review every change.

Experience

Full-Stack Software Engineer, IGT Systems (Bratislava, hybrid) Feb 2025 – present

- Led the project management module of **Core3**, a business platform for project management, HR and CRM: kanban boards, task permissions, Scrum and Waterfall workflows.
- Made the slowest Core3 pages fast after user complaints by finding and fixing N+1 database queries, adding caching and loading data in the background.
- Started the **WYDO** sports app for Android and iOS in Kotlin Multiplatform, then its React web app, and added passkey login across the app, the web and the backend.
- Built the **CleanEEG** web app from scratch, including a WebGL viewer that compares raw and cleaned EEG signals, and the frontend of an analytics dashboard for a large enterprise client.

React, TypeScript, TanStack, Kotlin, Spring Boot, Elixir, Phoenix LiveView, PostgreSQL, MongoDB

Full-Stack Developer, Švarba s.r.o. (remote) Jun 2024 – Jan 2025

- Designed and built the REST API for a new React back-office app that replaced older Laravel and Nette systems of an international direct-sales company.
- Added real-time notifications, scheduled imports and exports, and automatic translations with the OpenAI API; covered the API with more than 200 automated tests.

TypeScript, Node.js, Express, React, MSSQL, Redis, Jest, PHP, Nette

Junior Python Developer, SoftPoint s.r.o. (Bratislava, hybrid) Oct 2023 – May 2024

- Built data pipelines that import products, prices and stock from more than 20 suppliers into the data warehouse of a large e-commerce retailer.
- Automated ordering on 20 supplier web shops with headless-browser scripts in Ruby, a language I learned for this task.

Python, Airflow, pandas, Selenium, Ruby, PostgreSQL, FastAPI

Skills

Frontend	TypeScript, React, Next.js, TanStack (Query, Router, Table, Form), Tailwind CSS, Vue, Nuxt, accessibility, SEO
Backend	Kotlin, Spring Boot, Node.js, Express, Elixir, Phoenix, Python, FastAPI, PHP, Laravel, REST APIs
Mobile	Kotlin Multiplatform, Compose Multiplatform
Data	PostgreSQL, MongoDB, MSSQL, Redis, Airflow
AI	Agentic development with Claude Code (custom agents, skills, MCP servers), OpenAI API, PyTorch
DevOps and testing	Docker, GitLab CI, GitHub Actions, Linux, nginx, Vitest, Jest, Playwright, Cypress
Languages	Slovak (native), Hungarian (fluent, C2), English (advanced, C1), German (basic, A2)

Education

Ing. in Intelligent Software Systems, Slovak University of Technology in Bratislava 2022 – 2024

Thesis: neural networks that help detect glaucoma in eye images

Bc. in Computer Science, Slovak University of Technology in Bratislava 2019 – 2022

Selected projects

- **SmartTech e-shop** [🔗](#) (2021, rebuilt 2026): online shop with fuzzy search, checkout and admin area Laravel
- **Modern Fashion Store** [🔗](#) (2025, rebuilt 2026): inventory dashboard with live updates Elixir, Phoenix
- **Glaucoma segmentation** [🔗](#) (master's thesis): neural networks for eye images, Dice score up to 96.8 % PyTorch
- **This portfolio** [🔗](#) (2026): rebuilt with five older projects using AI coding agents Next.js

More: Pokédex, FakeShop, Feast Finder, Budget Master, Advent of Code, Iridescent and others on [my portfolio](#).
